

“BCIL has been at the forefront of the human rights and civil rights revolution for people with disabilities and other marginalized populations for decades. There is much to be proud of in BCIL’s remarkable history. There is also much to celebrate. But today we find these hard-won gains under attack by powerful anti-democratic, racist forces that would deny the fundamental humanity of so many. So, at this year’s Marie Feltin event let’s celebrate our history, and honor this year’s awardees through a commitment to resistance and service as never before. Marie would have really loved that.” ~ Dr. Robert J. Master
